Comp305 PS Instructions

1. The problem sets are from the OCW site, which also provides the solutions.
2. Problem sets will be self-graded. Reserve the last 24 hours before the deadline for grading. Use the point scale provided on the problem set.
3. Do not look at the solutions while working on the problem set prior to the grading period. Once you see the solution you lose the chance to discover the answer yourself.
4. You may discuss the problems with your friends verbally but follow the class policy: **NOTHING WRITTEN GETS EXCHANGED!**
5. You should credit any discussions, books, web sites or other resources you benefited from explicitly in your write-up.
6. Hand in your graded problem set on blackboard on the due date. No extensions.
7. You will be evaluated on the timely completion of your work and honesty of your grading. The actual points you receive will have no impact on your final grade.
8. Exception to rule #7: you are expected to spend time and effort on each problem (think minimum one hour per problem). If there is no evidence of work put in on a problem, points will be taken off from your grade.
9. Exercises should be completed and graded separately, i.e. you should give yourself one grade for Exercises and another grade for Problems.
10. Any violation of the above may result in disciplinary action or an F grade.
